I'll touch base with her in a bit. I'm surprised that messaging didn't come from @WestLakeMoms , they were going to be there. I'll keep an eye out. We were a little slow on the press release upload but we'll fix next time (our message still went out before on TW), it was an internal communication/priority mismatch, easy fix.

Please let me know if anything comes up.

Mary was asked to sit at the front table with Karl. Hope she'll get photos afterward. I followed all live local TV. Only Fox2 did anything live and it was a standup outside that I think might have been shot before the news conference.

I don't see any controversial posts and the limited traffic looks like it's on Twitter. If we can get an image or two from our folks (preferably with equipment), I will get those out on TW and FB with a link to our release.

Neither EPA or partners has any credible info of radioactive contamination at BMAC. Contamination at [#westlakelandfill](#) is contained to site.

There has been a lot of chatter stemming from the recent activity. I'll keep my eye out as well. I'm sure you all have seen this account and posts but figured I would share just in case:

<https://www.facebook.com/CoalitiontoKeepUsSafe>

<http://www.coalitiontokeepussafe.com/register.aspx>

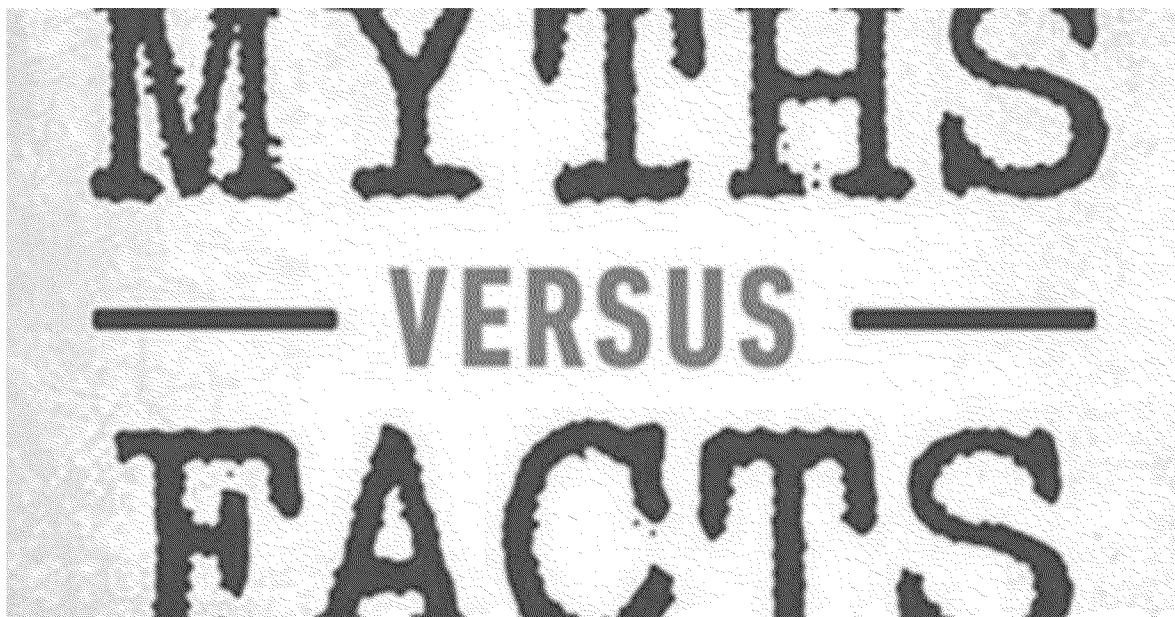

Coalition to Keep Us Safe shared a [link](#).

[2 hours ago](#)

MYTH: Transferring the West Lake Landfill to the U.S. Army Corps of Engineers FUSRAP would be the best way to protect us.

FACT: Transferring the West Lake Landfill to FUSRAP would mean years of additional delays and public uncertainty. The site would still fall under EPA review and standards and, it would be dependent on federal appropriations – taxpayer dollars – to fund the cleanup.

Fact vs. Fiction - Coalition to Keep Us Safe

<http://www.coalitiontokeepussafe.com/>

There is a lot of speculation and misinformation surrounding the West Lake Landfill. Local and state residents deserve to know the truth.

Good morning.

Can you all work together and funnel live monitoring and reporting of social media and news media conversations regarding today's news conference? You don't need to analyze the information, just report out.
